FOOTNOTE

138 We recommend careful inspection of the pivot bolt when replacing a lever and that you replace the pivot bolt and lock nut if there are any signs of wear or if the prior lever suffered any impact damage. We also recommend that you replace the lock nut, if applicable, anytime the lever is removed. Pivot bolt and lock nut must be installed and tightened properly as recommended by the manufacturer of your motorcycle. Please remember to lubricate the pivot bolt per the factory service manual recommendations. **144** Rev2 Kits have cables specifically designed for fitment on specific models, but the Rev2 throttle itself is not model specific. Therefore, in some situations, the Rev2 kit may not be a direct bolt on installation due to space limitations on the stock handlebar. In some installations, it may be necessary to move other control components on the stock handlebar, shorten the Rev2 throttle tube and grip, install longer after market handlebars, or possibly all of the above. It is up to the end user to determine the best method for fitment on their motorcycle, and ensure that the Rev2 kit is installed properly and with the correct clearances for safe operation. Installation should be done by a qualified mechanic and carefully checked for proper function. Warning: Improper installation could result in great bodily injury or death. **146** Rev2 cables can only be used with stock throttle body (or carburetor where applicable) and Rev2 throttle.

FOOTNOTE

143 For use with stock throttle bodies. Rev2 throttle kit for BMW S1000RR Vehicle production date range 09/08 - 03/12. Rev2 Kits have cables specifically designed for fitment on specific models, but the Rev2 throttle itself is not model specific. Therefore, in some situations, the Rev2 kit may not be a direct bolt on installation due to space limitations on the stock handlebar. In some installations, it may be necessary to move other control components on the stock handlebar, shorten the Rev2 throttle tube and grip, install longer aftermarket handlebars, or possibly all of the above. It is up to the end user to determine the best method for fitment on their motorcycle, and ensure that the Rev2 kit is installed properly and with the correct clearances for safe operation. Installation should be done by a qualified mechanic and carefully checked for proper function. Warning: Improper installation could result in great bodily injury or death. **147** Designed to fit BMW S1000RR production date range 09/08 - 08/12 Rev2 cables can only be used with stock throttle bodies (or carburetor where applicable) and Rev2 throttle.

FOOTNOTE

124 Apply a small amount of grease or WD40 to rubber seal when used for the first time. This will allow the tool to install easier on to the bleeder screw. On BMW models with bleeder screw rubber caps that have a lanyard (retaining loop) remove cap from bleeder screw. The lanyard may not allow the Mini Bleeder to seat fully over the bleeder screw hex. Note: BMW may update with a bleeder screw that may be larger or smaller in hex size than recommended by Motion Pro. Confirm bleeder screw hex size on your vehicle before purchase.

FOOTNOTE

088 Revolver cables can only be used with stock throttle body (or carburetor where applicable) and Revolver throttle. **144** Rev2 Kits have cables specifically designed for fitment on specific models, but the Rev2 throttle itself is not model specific. Therefore, in some situations, the Rev2 kit may not be a direct bolt on installation due to space limitations on the stock handlebar. In some installations, it may be necessary to move other control components on the stock handlebar, shorten the Rev2 throttle tube and grip, install longer after market handlebars, or possibly all of the above. It is up to the end user to determine the best method for fitment on their motor-cycle, and ensure that the Rev2 kit is installed properly and with the correct clearances for safe operation. Installation should be done by a qualified mechanic and carefully checked for proper function. Warning: Improper installation could result in great bodily injury or death. **146** Rev2 cables can only be used with stock throttle body (or carburetor where applicable) and Rev2 throttle.

FOOTNOTE

120 When 10-3000 is used on Gas Gas models, 10-3000 is 50 mm (2") longer than OEM housing length. Fits stock throttle and stock carburetor. Remove OEM slotted cable adjuster from throttle and thread T3 cable directly into throttle housing. Disregard KTM installation instructions and use OEM cable routing. **138** We recommend careful inspection of the pivot bolt when replacing a lever and that you replace the pivot bolt and lock nut if there are any signs of wear or if the prior lever suffered any impact damage. We also recommend that you replace the lock nut, if applicable, anytime the lever is removed. Pivot bolt and lock nut must be installed and tightened properly as recommended by the manufacturer of your motorcycle. Please remember to lubricate the pivot bolt per the factory service manual recommendations.

FOOTNOTE

088 Revolver cables can only be used with stock throttle body (or carburetor where applicable) and Revolver throttle. **138** We recommend careful inspection of the pivot bolt when replacing a lever and that you replace the pivot bolt and lock nut if there are any signs of wear or if the prior lever suffered any impact damage. We also recommend that you replace the lock nut, if applicable, anytime the lever is removed. Pivot bolt and lock nut must be installed and tightened properly as recommended by the manufacturer of your motorcycle. Please remember to lubricate the pivot bolt per the factory service manual recommendations. **145** 01-2765 Rev2 throttle kit features throttle cable set 01-1270 that is 3 inches longer than throttle cable 01-1225 included in Rev2 throttle kit 01-2723. **146** Rev2 cables can only be used with stock throttle body (or carburetor where applicable) and Rev2 throttle. **148** 3 inches longer than standard length Rev2 throttle cable part number 01-1269. Rev2 cables can only be used with stock throttle body (or carburetor where applicable) and Rev2 throttle

FOOTNOTE

089 Fits WP 4357, 4860 series forks with fork spring pre-load adjuster and 4860 MXMA CC series forks. Does not fit WP XPlor 48 fork with external spring pre-load adjustment wings. **138** We recommend careful inspection of the pivot bolt when replacing a lever and that you replace the pivot bolt and lock nut if there are any signs of wear or if the prior lever suffered any impact damage. We also recommend that you replace the lock nut, if applicable, anytime the lever is removed. Pivot bolt and lock nut must be installed and tightened properly as recommended by the manufacturer of your motorcycle. Please remember to lubricate the pivot bolt per the factory service manual recommendations.

FOOTNOTE

138 We recommend careful inspection of the pivot bolt when replacing a lever and that you replace the pivot bolt and lock nut if there are any signs of wear or if the prior lever suffered any impact damage. We also recommend that you replace the lock nut, if applicable, anytime the lever is removed. Pivot bolt and lock nut must be installed and tightened properly as recommended by the manufacturer of your motorcycle. Please remember to lubricate the pivot bolt per the factory service manual recommendations. **198** Lever length shorter than stock lever. We recommend careful inspection of the pivot bolt when replacing a lever and that you replace the pivot bolt and lock nut if there are any signs of wear or if the prior lever suffered any impact damage. We also recommend that you replace the lock nut, if applicable, anytime the lever is removed. Pivot bolt and lock nut must be installed and tightened properly as recommended by the manufacturer of your motorcycle. Please remember to lubricate the pivot bolt per the factory service manual recommendations. **204** WARNING: FOR BREMBO MASTER CYLINDER ONLY. PURCHASE 14-9016 IF YOUR BIKE USES A MAGURA MASTER CYLINDER. We recommend careful inspection of the pivot bolt when replacing a lever and that you replace the pivot bolt and lock nut if there are any signs of wear or if the prior lever suffered any impact damage. We also recommend that you replace the lock nut, if applicable, anytime the lever is removed. Pivot bolt and lock nut must be installed and tightened properly as recommended by the manufacturer of your motorcycle. Please remember to lubricate the pivot bolt per the factory service manual recommendations.

FOOTNOTE

089 Fits WP 4357, 4860 series forks with fork spring pre-load adjuster and 4860 MXMA CC series forks. Does not fit WP XPlor 48 fork with external spring pre-load adjustment wings. **190** When 11-0080 Micro Bleeders are to be installed on WP 48 4CS forks, the Bleeders require a special O-ring available separately from Motion Pro. Please contact Motion Pro Warranty or Technical Support and provide a mailing address to receive a set of special O-rings.

FOOTNOTE

069 Warning: This kit disables the stock throttle override system. This kit will not shut off the engine if your throttle or carb sticks in the open position. A stuck throttle could result in uncontrolled acceleration and great bodily injury or death. This product is intended for closed course racing by expert riders only. This product must be installed by experienced professional mechanic. Improper installation could result in great bodily injury or death. User assumes all responsibility for proper installation and use of this product. **145** 01-2765 Rev2 throttle kit features throttle cable set 01-1270 that is 3 inches longer than throttle cable 01-1225 included in Rev2 throttle kit 01-2723. **146** Rev2 cables can only be used with stock throttle body (or carburetor where applicable) and Rev2 throttle. **160** 01-2784 Rev2 throttle kit features throttle cable set 01-1292 that is 3 inches longer than throttle cable 01-1289 included in Rev2 throttle kit 01-2783. **161** 3 inches longer than standard length Rev2 throttle cable part number 01-1289. Rev2 cables can only be used with stock throttle body (or carburetor where applicable) and Rev2 throttle. **186** For use with stock throttle body. **IMPORTANT** - The Rev2 throttle does not have the starter and kill switch wiring or switches that are built into your stock throttle assembly. Use of the Rev2 Throttle requires an after market kill switch and starter button assembly not included in kit. Please use 11-0106 Handlebar Stop/Start Switch, KTM A for this application. Rev2 Kits have cables specifically designed for fitment on specific models, but the Rev2 throttle itself is not model specific. Therefore, in some situations, the Rev2 kit may not be a direct bolt on installation due to space limitations on the stock handlebar. In some installations, it may be necessary to move other control components on the stock handlebar, shorten the Rev2 throttle tube and grip, install longer after market handlebars, or possibly all of the above. It is up to the end user to determine the best method for fitment on their motorcycle, and ensure that the Rev2 kit is installed properly and with the correct clearances for safe operation. Installation should be done by a qualified mechanic and carefully checked for proper function. Warning: Improper installation could result in great bodily injury or death.

FOOTNOTE

069 Warning: This kit disables the stock throttle override system. This kit will not shut off the engine if your throttle or carb sticks in the open position. A stuck throttle could result in uncontrolled acceleration and great bodily injury or death. This product is intended for closed course racing by expert riders only. This product must be installed by experienced professional mechanic. Improper installation could result in great bodily injury or death. User assumes all responsibility for proper installation and use of this product. **145** 01-2765 Rev2 throttle kit features throttle cable set 01-1270 that is 3 inches longer than throttle cable 01-1225 included in Rev2 throttle kit 01-2723. **146** Rev2 cables can only be used with stock throttle body (or carburetor where applicable) and Rev2 throttle. **160** 01-2784 Rev2 throttle kit features throttle cable set 01-1292 that is 3 inches longer than throttle cable 01-1289 included in Rev2 throttle kit 01-2783. **161** 3 inches longer than standard length Rev2 throttle cable part number 01-1289. Rev2 cables can only be used with stock throttle body (or carburetor where applicable) and Rev2 throttle.

FOOTNOTE

138 We recommend careful inspection of the pivot bolt when replacing a lever and that you replace the pivot bolt and lock nut if there are any signs of wear or if the prior lever suffered any impact damage. We also recommend that you replace the lock nut, if applicable, anytime the lever is removed. Pivot bolt and lock nut must be installed and tightened properly as recommended by the manufacturer of your motorcycle. Please remember to lubricate the pivot bolt per the factory service manual recommendations.

FOOTNOTE

138 We recommend careful inspection of the pivot bolt when replacing a lever and that you replace the pivot bolt and lock nut if there are any signs of wear or if the prior lever suffered any impact damage. We also recommend that you replace the lock nut, if applicable, anytime the lever is removed. Pivot bolt and lock nut must be installed and tightened properly as recommended by the manufacturer of your motorcycle. Please remember to lubricate the pivot bolt per the factory service manual recommendations.

FOOTNOTE

089 Fits WP 4357,4860 series forks with fork spring pre-load adjuster and 4860 MXMA CC series forks. Does not fit WP XPlor 48 fork with external spring pre-load adjustment wings. **128** If the bike is equipped with KTM accessory WP 43/WP 48 fork caps (P/N's 4860.0074S and 4860.0075S) that have external spring pre-load adjustment, use micro bleeder 11-0080. **190** When 11-0080 Micro Bleeders are to be installed on WP 48 4CS forks, the Bleeders require a special O-ring available separately from Motion Pro. Please contact Motion Pro Warranty or Technical Support and provide a mailing address to receive a set of special O-rings.

FOOTNOTE

138 We recommend careful inspection of the pivot bolt when replacing a lever and that you replace the pivot bolt and lock nut if there are any signs of wear or if the prior lever suffered any impact damage. We also recommend that you replace the lock nut, if applicable, anytime the lever is removed. Pivot bolt and lock nut must be installed and tightened properly as recommended by the manufacturer of your motorcycle. Please remember to lubricate the pivot bolt per the factory service manual recommendations. **144** Rev2 Kits have cables specifically designed for fitment on specific models, but the Rev2 throttle itself is not model specific. Therefore, in some situations, the Rev2 kit may not be a direct bolt on installation due to space limitations on the stock handlebar. In some installations, it may be necessary to move other control components on the stock handlebar, shorten the Rev2 throttle tube and grip, install longer after market handlebars, or possibly all of the above. It is up to the end user to determine the best method for fitment on their motorcycle, and ensure that the Rev2 kit is installed properly and with the correct clearances for safe operation. Installation should be done by a qualified mechanic and carefully checked for proper function. Warning: Improper installation could result in great bodily injury or death. **146** Rev2 cables can only be used with stock throttle body (or carburetor where applicable) and Rev2 throttle.

FOOTNOTE

088 Revolver cables can only be used with stock throttle body (or carburetor where applicable) and Revolver throttle. **144** Rev2 Kits have cables specifically designed for fitment on specific models, but the Rev2 throttle itself is not model specific. Therefore, in some situations, the Rev2 kit may not be a direct bolt on installation due to space limitations on the stock handlebar. In some installations, it may be necessary to move other control components on the stock handlebar, shorten the Rev2 throttle tube and grip, install longer after market handlebars, or possibly all of the above. It is up to the end user to determine the best method for fitment on their motorcycle, and ensure that the Rev2 kit is installed properly and with the correct clearances for safe operation. Installation should be done by a qualified mechanic and carefully checked for proper function. Warning: Improper installation could result in great bodily injury or death. **146** Rev2 cables can only be used with stock throttle body (or carburetor where applicable) and Rev2 throttle. **197** Tire lever with 27mm wrench to remove rear axle nut. Forged 7075 T-6 aluminum. Can use 08-0327 T6 drive adapter with 08-0387 socket for removing 22 mm front axle nuts (Check front axle nut size before ordering 08-0327 and 08-0387).
